Page 34 – Voluntary Sterilization

We have added a new benefit for Voluntary Sterilization.

Benefit: Voluntary Sterilization

Services included: The federal government requires states to cover sterilization when certain conditions are met. This is to protect against practices that had historically forced sterilizations upon marginalized groups. Protections against these practices include requiring signature of an informed consent form at least 30 days prior to a procedure.

Limitations: Covered for members age 21 and older with signed federal sterilization consent form. At least 30 but not more than 180 days must pass between the date of your signature and the procedure.

Who to contact: Contact your PCP. Members are welcome to choose a family planning provider without a need for a referral.
