WINTER 2019 | ¡VOLTEE PARA ESPAÑOL!

What do you think?

In a few weeks, you may get a survey in the mail. It asks how happy you are with UnitedHealthcare Community Plan. If you get a survey, please fill it out and mail it back. Your answers will be private. Your opinion helps us make the health plan better.

90-day supply benefit.

Your plan now covers a 90-day supply of select medications. With a 90-day supply, you won't need to get a refill every month.

If you would like to participate:

- **Talk with your doctor to see if your medications qualify.** If so, your doctor can write you a new prescription for a 90-day supply.
- **Talk to your pharmacist.** Your pharmacist can call your doctor to get a new prescription for a 90-day supply.

Pharmacy benefit coverage rules still apply. Only covered drugs will be available for a 90-day supply. Please check your pharmacy coverage rules for more details.

We've got you covered. To find out what medications are included, call Member Services toll-free at the number on the back of your member ID card.

Test time.

Cervical cancer usually does not have any symptoms. The way to find out if you have it is with a Pap test. This is a quick and simple test that looks for early signs of cancer. Your doctor uses a brush or swab to collect some cells from your cervix. A lab looks at the cells under a microscope.

The American Cancer Society recommends Pap screening for women every 3 years between ages 21 and 29. Then Pap and HPV tests every 5 years between ages 30 and 65. Testing can end at age 65 for women with a history of normal Pap results.

Get checked. Is it time to schedule your screening?

Talk to your doctor. Together, you can create the best cervical cancer screening schedule for you. Need to find a new doctor? Call Member Services toll-free at the number on the back of your member ID card. Or visit our member website at myuhc.com/CommunityPlan or use the UnitedHealthcare **Health4Me**® app.

Take charge.

See your PCP for your annual well visit.

Checkups aren't just for kids. They can help adults stay healthy, too. See your primary care provider (PCP) once a year for a well visit. You will get any tests, exams, shots or other treatments you need to stay healthy. Your PCP can look for problems that often don't have symptoms.

You and your PCP are a team. You can work together to keep you well and make sure you get the care you need. Your PCP can give you advice about your health. Day or night, your PCP is only a phone call away. Your PCP can also refer you to the hospital or specialists when needed.

Get off to a good start this year by scheduling an appointment with your PCP. Check your member ID card for your assigned PCP. You will only be able to get primary care services from the PCP on your member ID card or another primary care provider in the same practice. If your ID card has a different PCP, or if you want to choose a new PCP, please call Member Services.

Questions? We can help. Call Member Services toll-free at the number on the back of your member ID card. We can help you change your PCP or update your PCP if the name on your member ID card is incorrect.

Under control.

Tests for people with diabetes.

If you have diabetes, it is important to make your health a priority. It takes constant, careful monitoring to keep diabetes under control. Regular testing helps you see how you're doing. Have you gotten these tests recently?

- **A1c blood test.** This lab test shows how well your blood sugar has been controlled over the last few months. Get this test 2 to 4 times per year.
- **Heart disease.** Controlling your cholesterol and blood pressure can protect your heart. Get your cholesterol checked once a year or when your doctor says you should. It's important to keep your blood pressure below 130/80. Get your blood pressure checked at every visit.
- **Kidney function.** Diabetes can damage your kidneys. A urine test and a blood test can check to make sure yours are working right. Get tested once a year.
- **Dilated eye exam.** High blood sugar can cause blindness. In this test, eye drops make your pupils bigger so your retina can be checked. It helps find problems before you notice them. Get this test once a year.
- **Foot exam.** Get your feet examined once a year to check for wounds and nerve damage.

We make it easy. These tests are covered benefits.

If you need help making an appointment or getting to the doctor, call Member Services toll-free at the number on the back of your member ID card. Or use the **Health4Me** app.

Lean lunch.

Use leftover chicken breast for a healthy lunch the next day. Make a chicken club wrap lunch box. Add even more fruits and vegetables on the side to add more nutrients and fiber.

INGREDIENTS

- 1 10-inch flour tortilla or sandwich wrap
- 1 cup cooked chicken breast, chopped or sliced
- 1 small tomato, chopped or sliced
- 1 cup romaine lettuce or spinach, shredded
- ¼ cup low- or nonfat salad dressing (optional)

For sides:

- 8–12 baby carrots
- ¼ cup grapes or berries

DIRECTIONS

Layer chicken, tomato and lettuce or spinach on the tortilla within 1 inch of edges. Drizzle with light salad dressing, if desired. Fold opposite sides of tortilla up toward center, about 1 inch over filling (sides will not meet in center); roll up tortilla, beginning at 1 open end. Cut diagonally in half. Add side servings of carrots, grapes or berries.

10 facts about depression.

Things to know when you're feeling down.

- 1. Depression affects your thinking.** If you have thoughts of suicide, please call someone right away. You can call the National Suicide Prevention Lifeline at **1-800-273-TALK (8255)** or the National Hopeline Network phone at **1-800-SUICIDE (1-800-784-2433)**.
- 2. Depression makes it hard to give.** It's hard to think of other people when you're depressed.
- 3. Depression is often experienced as anxiety.** Make sure you get a correct diagnosis. This will help you get the best treatment for you.
- 4. Ongoing irritability can be a symptom of depression.**
- 5. Chronic pain can be another symptom of depression.** At the same time, being in continual discomfort can cause you to become depressed.
- 6. Alcohol is a depressant.** So are marijuana and many other recreational or street drugs. Using these substances could make you feel worse in the long run.
- 7. People don't choose to be depressed.** But they do make a choice about how to deal with it. Denying that you have a problem will not make you feel better.
- 8. Depression can be as hard on your loved ones as it is on you.** Those closest to you may start to feel unloved. Try to show your love in small ways you can manage.
- 9. Exercise is the easiest and least expensive cure for depression.** Walking just 30 minutes a day can help.
- 10. Sometimes talk therapy can work wonders.** Think about seeking counseling.
